DETAILED ACTION***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 63 and 64 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohmi et al (US 6372646) in view of Nakata (US 5349604).

Re clms 63,64,: Ohmi et al discloses an illuminator comprising: an illumination system (Ohmi et al Fig 4) through which luminous flux is projected onto an object (Ohmi et al 31), the illumination system having plural optical units (Ohmi et al 25, 26) and projects ultraviolet light (Ohmi et al Col 7 line 27) wherein a unit of said system comprises at least a prism (Col 10 line 64) and a filter (Col 1 line 21). However, Ohmi et al does not disclose a surface onto a portion of which a titanium oxide film absorbing ultraviolet light is applied. Nakata teaches that plural surfaces (Nakata S1, S2) of an illuminator (Nakata Fig 1) should have titanium oxide applied to them in order to prevent nonuniformity of luminous flux (Nakata Col 1 lines 40-46). Therefore it would have been obvious to a person of ordinary skill in the art at the time the invention was made to apply titanium oxide to the plural optical units of the illuminator of Ohmi et al because it would prevent nonuniformity of the luminous flux projected by the apparatus of Ohmi et al.

Allowable Subject Matter

Claims 1-62 are allowed.
